

BHUVAN SARAKAM

Senior Data Engineer | Databricks & Cloud Analytics

Denver, CO | bhuvansarakam@gmail.com | +1 (678) 989-6307 | linkedin.com/in/bhuvansdata | github.com/Bchamp21

PROFESSIONAL SUMMARY

Senior Data Engineer with 10+ years architecting enterprise data platforms and cloud analytics solutions across Banking, Insurance, and Asset Management (financial services). Deep hands-on expertise in the Databricks ecosystem — PySpark, Delta Lake, Unity Catalog, and Databricks Workflows/Jobs — paired with Azure Data Factory, ADLS Gen2, and Kafka/Event Hubs streaming for high-performance ETL/ELT pipelines. Builds and integrates REST APIs, manages source code in Git, and ships through Azure DevOps CI/CD with Terraform-based infrastructure as code. Delivered pipelines supporting \$73B AUM at Janus Henderson with 99.8% SLA across 500+ fund MDM datasets; Doctor of Business Administration candidate (Belhaven University) framing engineering decisions in measurable business outcomes.

TECHNICAL SKILLS

Databricks Ecosystem: Databricks Workspaces · PySpark · Delta Lake · Unity Catalog · Databricks Workflows/Jobs · MLflow · Databricks Genie

Data Platforms: Microsoft Fabric · Snowflake · Azure Synapse Analytics · Medallion Architecture (Bronze/Silver/Gold)

Data Engineering: Azure Data Factory (ADF) · ETL/ELT · T-SQL · Python · Query Optimization & Performance Tuning · Data Cleansing & Quality · ADLS Gen2 · Kafka · Event Hubs · Airflow · dbt · Spark Streaming

Integration & Source Control: REST APIs · .NET Core / Python APIs · Git · Database Change Management · Tables/Views/Stored Procedures/Functions/Triggers · SSMS

DevOps / MLOps: Azure DevOps CI/CD · Terraform · Docker · Automated Testing · Blue/Green Deployments · Agile/Scrum

Governance & BI: Data Governance · Master Data Management (MDM) · Power BI · SSRS/SSIS · Enterprise Data Warehousing

AI / ML: LangChain · LangGraph · RAG Pipelines · Snowflake Cortex AI · NLP · Predictive Modeling · LLM Integration

BUSINESS IMPACT

- **Delivery scale** — 398+ commits contributed across 14 MDM delivery work streams and 3 production repositories — spanning a .NET application layer, a Databricks lakehouse, and a Snowflake warehouse — over 4 release trains.
- **Pipeline reliability** — Automated triage of 50 production pipeline runs (10 failures, 40 SLA breaches) spanning 9 recurring BAU problem themes, cutting mean-time-to-detect from hours to 5 minutes.
- **Data integrity** — Applied SQL-based row/column diagnostics to isolate 120 actionable data-mapping gaps and 184 missing downstream registrations, and recovered corrupted reference records after a staging-load failure.
- **Career-wide track record** — 35–40% ETL/data-latency reductions delivered across Zurich, Hubbell, and Janus Henderson; <10% quarterly error rate on production risk models at TransUnion; 92% ML prediction accuracy vs. 78% baseline at Cognizant.

PROFESSIONAL EXPERIENCE

Sr. Data Engineer / Application Engineer · Janus Henderson Investors

Sep 2024 – Present · Denver, CO

- Built end-to-end Medallion Architecture pipeline (Bronze→Silver→Gold) using ADF, ADLS Gen2, and Databricks Delta Lake for 500+ fund MDM datasets — cutting data latency 40% through layered cleansing, deduplication, and validation.
- Wrote T-SQL, Python, and PySpark code to design, test, and maintain database objects (tables, views, stored procedures, functions, triggers) supporting institutional data ecosystems and reporting pipelines.
- Implemented systematic data quality and cleansing across MSCI BarraOne, FactSet, Aladdin, and Atlas source systems, improving portfolio risk attribution accuracy 30%.
- Drove CI/CD-based code migration using Azure DevOps and Git — reducing release cycles 60% to daily deployments at 98% reliability with automated testing gates and blue/green Databricks deployments.
- Engineered .NET Core and Python REST APIs for Product Master MDM — 99.8% SLA compliance across 150+ orchestrated pipelines; automated 150+ BAU workflows replacing Autosys chains with event-driven orchestration.

Sr. Cloud Data Developer (Contract) · Janus Henderson Investors

May 2023 – Sep 2024 · Denver, CO

- 35% expansion in global investable-universe — built PySpark + Databricks Workflows pipelines processing \$73B AUM data using ensemble scoring across multi-year horizons.
- 25% reduction in data-delivery latency — engineered dbt-modeled Snowflake layers with version-controlled data models and Azure DevOps CI/CD deployment pipelines.

- Automated 150+ BAU data-quality workflows via ADF + Databricks Workflows, replacing fragile Autosys job chains with Event Hubs-driven orchestration, reducing reconciliation effort 60%.

Senior Data Engineer • Hubbell Incorporated

Jun 2020 – Aug 2021 • Remote

- 80% faster data refresh (daily → hourly) — replaced Autosys batch jobs with event-driven ADF + dbt pipelines and Azure DevOps automated deployments.
- 15% revenue leakage recovered — built ADF + Power BI pipelines using optimized T-SQL to capture unearned cash discounts; geospatial dashboards improving decision speed 25%.

Data Engineer • Zurich Insurance

Dec 2019 – May 2020 • India

- Migrated Oracle SQL to SSMS/SSRS on AWS RDS/Redshift; replaced Autosys with Airflow-orchestrated SSIS/Python pipelines — 40% faster reporting, 35% ETL reduction.

Data Engineer — Credit Risk • TransUnion CIBIL

Oct 2018 – Nov 2019 • India

- <10% quarterly error rate on CECL models — ADF + Event Hubs PD/EAD pipelines; led 3-analyst team delivering 2 weeks ahead of schedule.

Data Analyst • Citi

Feb 2018 – Sep 2018 • India

- 20 bps loss reduction, approval rates 51%→90% — Decision Tree CLD policy optimization; Python + SAS predictive models for multi-million dollar decisions.

Data Engineer — Fraud Detection • American Express

Jan 2017 – Jan 2018 • India

- 18% fraud detection improvement + 25% synthetic accounts blocked — KModes/SGD models, SQL email-pattern engine, Kafka + Spark + Airflow pipelines (40% latency reduction); won AmEx Data Science Championship.

Data Engineer • Cognizant

Jun 2016 – Jan 2017 • Bangalore, India

- 92% seismic ML accuracy vs. 78% baseline — 5 ML models on AWS EC2/S3/Step Functions; IBM Watson NLP chatbot cut IT ticket resolution 30%; 85% workflows automated.

AI AGENT PORTFOLIO

Designed and deployed a 17-agent automation suite extending the Databricks/ADF platform at Janus Henderson with self-monitoring, self-healing, and auditing capability — built with LangGraph, MCP, and REST integrations to Claude/OpenAI/Gemini.

- **ADF Sync Agent & Watchdog** — Self-healing monitor for an hourly Azure Data Factory pipeline; triages run histories and database error logs to catch and recover from missed runs before data loss occurs.
- **Autonomous Pipeline Monitor** — Auto-triages pipeline runs across 7 pipelines and 4 environments (50 runs classified by severity), cutting detection time from hours to 5 minutes.
- **Database Bottleneck Auditor** — SQL-based row/column-level diagnostics that isolated 120 data-mapping gaps and 184 missing downstream registrations.
- **BAU & Copilot Orchestrators** — Automated BAU incident triage and cross-system (ADO/ADF) routing, consolidating 9 recurring problem themes into one workflow with Jira ticketing and Power BI reporting.
- **Reviewer, Tracker, Teacher & Agent Builder** — Supporting agents that QA-gate code changes, correlate failures to precedent, convert incidents into post-mortems, and scaffold new specialist agents from a standard template.

EDUCATION

Doctor of Business Administration (DBA)

Belhaven University | In Progress

Coursework: Issues in Marketing, Consumer Behavior, Business Analytics, Organizational Strategy — applied to AI product personalization, LLM business-impact measurement, and data-driven go-to-market strategy.

M.S., Applied Computer Science

Northwest Missouri State University | 2021–2022

M.Tech & B.Tech, Mechanical Engineering (Intelligent Manufacturing)

IIT Madras | 2011–2016

CERTIFICATIONS & AWARDS

Google AI Professional Certificate • Academy Accreditation – Generative AI Fundamentals • AWS Cloud Practitioner Essentials • Certified Data Scientist – INSOFE (2016) • American Express Data Science Championship — 1st Place (2017) • Janus Henderson Quarterly Town Hall Shout Out Award
